Pre Production
Site: Melody

Melody is a social media platform for producers, artists, and fans. Users can find their favorite artists right on the site, play their favorite songs, and be part of a community. Melody aims to build a platform that allows artists to connect directly with their fans, and for fans to connect with each other. Musicians and fans often have trouble finding communities for themselves and most have to use separate music apps and accounts to find new content. Users can follow artists to stay in touch and keep updated about new releases and posts. They can also share their songs with friends inside the platform for a better experience listening together. With Melody, you can stay in tune with the tunes around you!
